

FOR IMMEDIATE RELEASE

March 9, 2017

**PRESS CONFERENCE 11:30 A.M. March 9, 2017 AT 101 BOWIE ST SPONSORED BY THE
SAN ANTONIO FAMILY ASSOCIATION**

ELITE SAN ANTONIO EUGENCISTS gather for their annual pilgrimage to the Marriot Rivercenter to raise funds for the killing of innocent preborn children in the name of health care and “Planned Parenthood.” Like those of the *Buck v. Bell* era, these donors willingly provide money so that the “unwanted” will not be born and those “lives unworthy of life” never see the light of day, but rather die a death by chemical poisoning or dismemberment.

The pretense will be the same tired argument, that it is a woman’s right to choose, as if women have no capacity to make decisions prior to being pregnant. False claims of providing genuine health services will be put forth. These claims aren’t supported by the statistics. “Planned Parenthood” performs only 3% of all pap smears, 2% of all breast screenings, 0 (ZERO) mammograms. Despite their claims that abortion is only a small percentage of the medical care they provide, they account for 33% of elective abortions in America.

“Planned Parenthood” performs roughly 330,000 abortions each year. Their commitment to “protecting” the world from the “unwanted” is so great, that they turned down President Trump’s offer to keep their federal funding, if they would simply stop killing the preborn. Of course, they argue this is a matter of liberty for women, yet the REAL reason is they make the bulk of their profits by baby killing.

Headlining this year’s event for the San Antonio supporters of death, are Diane Rehm and Jeffrey Rosen. Ms. Rehm is a “right to die” advocate (she likes to see life terminated at both ends of the spectrum) and former NPR radio host. Jeffrey Rosen is an attorney with a distinguished legal career on the Left, and certainly will perpetuate the idea that somehow abortion is a legal necessity in a civilized society and a fundamental right for women (after all what woman wouldn’t like to be like Lady Macbeth, willing to bash the brains out of her suckling child in order to gain whatever it is that she desires out of life).

One is left to wonder, should chicken be on the menu, would they get the irony of choosing either a breast or a leg? Especially, after they have been caught red-handed trading in body parts. But this is beyond the comprehension of those who argue that somehow an entirely separate human being is merely a body part or wart which one may freely remove or a trespasser to be kicked out rather than a child to be loved and cared for. The lack of moral reasoning and their supposed justification requires a great education in idiocy.

Join members of the San Antonio Family Association outside this event, which Marriot seems to be so willing to host each year from. We will be making the common sense argument that preborn children are living human beings (we’ve checked, they have human DNA, they are growing, they respond to pain, and they already have a determined gender). Meanwhile over drinks, legs and breasts, the fine elite who desire to do away with the “evil unplanned” and “unwanted” children will be casually discussing the virtues of dismembering babies (most often, brown or black babies or baby girls). This event is reminiscent of dinners held in Berlin in 1938, but that is another chapter in the history of eugenics.
